

I'm Thinking of Something That....

- Is wet
- Makes up more than $\frac{1}{2}$ of our bodies
- Our bodies can't survive without
- You can swim in
- Can help you get clean
- You can use to wash your clothes
- You can drink
- Makes up about $\frac{3}{4}$ of the earth
- Farmers can't do without
- You can throw
- Can be used to make electrical power
